Reception | Autumn 1

## I can name numbers in order to 10.

I can compare $\mathbf{2}$ numbers by saying which is more or less.

By the end of this half term, children should be able to say the numbers to 10 in order and also be able to compare the size of 2 numbers within 10 . The aim is to be able to recall the numbers instantly and know which number is larger/smaller instantly.

Children should say the following number names in order:

They should also know which number is larger/smaller out of 2 numbers given to them:

## 6 and 1

# $$
678910
$$ <br> 012345 <br> <br> 678910 

 <br> <br> 678910}

## Top tips

The secret to success is practising little and often. Use time wisely.
Can you practise these KIRFs while walking to school or during a car journey?

Perhaps you could have number cards that you can show your child and they say which number is larger or smaller in value. Maybe use lego or other small objects to help compare the quantities if they find it tricky.
