

Key Instant Recall Facts

Reception | Summer 1

I can recall some number bonds of numbers 0-10.

I know some odd and even numbers to 10.

By the end of this half term, children should be able to say some number bonds of numbers to 10. The aim is for them to say these bonds instantly when they see the whole number. They should also be able to say whether a number up to 10 is odd or even.

Children should know number bonds of any number between 1 and 10. Below are example of how to make 1, 2, 3, 4 and 5.

$0 + 1 = 1$

$1 + 0 = 1$

$0 + 2 = 2$

$1 + 1 = 2$

$0 + 2 = 2$

$0 + 3 = 3$

$1 + 2 = 3$

$0 + 4 = 4$

$1 + 3 = 4$

$2 + 1 = 3$

$2 + 2 = 4$

$3 + 0 = 3$

$3 + 1 = 4$

$4 + 0 = 4$

$0 + 5 = 5$

$1 + 4 = 5$

$2 + 3 = 5$

$3 + 2 = 5$

$4 + 1 = 5$

$5 + 0 = 5$

The children may be able to represent the number bonds on a tens frame or on a part whole model:

Even numbers: 2, 4, 6, 8, 10, Odd numbers: 1, 3, 5, 7, 9

Top tips

The secret to success is practising little and often. Use time wisely. Can you practise these KIRFs while walking to school or during a car journey? You don't need to practise them all at once: perhaps you could have a fact of the day.
